

We need your help!

Do you have 5 minutes to spare to help our watershed?

Please take a short online survey so we can assess the services and progress of the Napa County Stormwater Pollution Prevention Program.

The Napa County Stormwater Pollution Prevention Program helps protect and improve water quality in Napa County.

Your survey results will help us evaluate the progress of the Program and assist us in directing our resources in the most effective ways. It is anticipated that the survey will take approximately 5 minutes of your time to complete. Access the survey at:

www.surveymonkey.com/s/stormwatersurvey

For additional stormwater information and to learn more about the resources available to you from the stormwater program, visit:
