

# Bay Area Integrated Regional Water Management Plan (IRWMP) Update

## Kick-off Meeting for Napa River and Suisun Creek Watershed Stakeholders

5:30 - 7:30 pm, February 21, 2012  
Yountville Community Center

### Help Identify Water Resource Priorities for Our Region!

**Do you live in the Napa River or Suisun Creek watersheds?  
Are you concerned about water supply, flood management, stormwater runoff, or the  
environment in the watershed?**

Local public agencies are partnering to identify and address regional water resources challenges and opportunities within the watershed. With input from their communities, these public agencies will contribute to updating the Bay Area Integrated Regional Water Management Plan by late 2012.

The Plan describes:

- Water supply reliability
- Water conservation
- Water quality improvement
- Stormwater management
- Flood management
- Invasive species abatement
- Wetlands enhancements and protections
- Environmental and habitat improvements and protections

### Kick-off Meeting

- Learn about plan elements and the schedule for completing the update
- Discover what types of projects are being sought for inclusion in the plan update
- Tour Napa County's new on-line project database - <http://projects.napawatersheds.org>
- Explore how the project database will facilitate public participation in integrated water resources planning and coordination for potential funding opportunities
