

Date: March 14, 2013

Time: 10:30 am ~ 12 noon

Location:

Presentations:

Napa Valley College
Building 1400, Room 1434

2277 Napa-Vallejo Hwy
Napa, CA

The Napa River watershed has a large number of alluvial fans. Alluvial fans are different in form and function from streams on the valley floor. This workshop will describe alluvial fan processes local examples include Rector, Mill, Ritchie and Conn Creeks in Napa Valley and various valleys in the Russian River watershed. Appropriate management and revegetation practices will be presented. Then we will have a field trip to see a revegetation project at the alluvial fan on Rector Creek. Please wear appropriate field clothes, sturdy shoes and bring water and a hat.

Speakers include:

Laurel Marcus, Executive Director, CLSI

Anya Perron-Burdick, Stewardship Manager, The Center for Social and Environmental Stewardship

Mia Docto, Geomorphologist Graduate Student, UC Berkeley
