INTRODUCTION

1.1 PURPOSE OF THE PLAN

The Napa River Watershed (Napa River) Stormwater Resource Plan (SWRP) was created to facilitate the identification of opportunities and future development and implementation of stormwater management projects and programs that provide multiple benefits including improved water quality, reduced localized flooding, increased water supplies for beneficial uses, and community enhancement. Pursuant to Senate Bill 985 (SB 985), a SWRP must be developed in order to receive grant funding for stormwater and dry weather runoff capture projects from any voter-approved bond after January 1, 2014, including the Proposition 1 bond act. The SWRP must satisfy requirements in SB 985 and the State Water Resources Control Board's (State Water Board's) SWRP Guidelines¹ to be eligible for such grant funding.

Development of the Napa River SWRP is consistent with the Storm Water Resource Plan Guidelines set forth by the State Water Board, as demonstrated by the completed SWRP Checklist (Appendix A). The Napa River SWRP is a high-level planning approach to identify potential stormwater management projects and opportunities that are eligible to apply for state grant funding. Although the Napa River SWRP identifies and provides a list of potential project opportunities, the development, planning, and implementation of these projects will undergo additional municipal planning processes if projects are proposed for implementation. Ultimately, the implementation of multiple-benefit Napa River SWRP projects will help protect beneficial uses of waters in the Napa River Watershed and the Napa Valley Subbasin, which provide important environmental, community, health, and economic benefits.

1.2 NAPA RIVER WATERSHEDS: APPROACH AND CHARACTERIZATION

The Napa River Watershed boundary delineates the planning area of the Napa River SWRP (as described in Section 3 and shown in Figure 2). There are three major watersheds within Napa County: Napa River, Suisun Creek, and Putah Creek. This plan focuses on the Napa River Watershed, which encompasses the Napa Valley Subbasin. The small portion of the Napa River Watershed that extends into Solano County and the Suisun Creek and Putah Creek watersheds are not addressed in this plan.

The Napa River Watershed is subject to similar water quality stressors as the San Francisco Bay and is subject to regional Total Maximum Daily Loads (TMDLs) due to San Francisco Bay water quality impairments. The watershed is also subject to local TMDLs and regulatory requirements calling for control measures to address the loading of sediment and pathogens to the Napa River. Green infrastructure (GI) is recognized as an essential strategy for the region to mitigate the effects of urbanization and address these water quality concerns. Managed aquifer recharge projects were identified as planned projects in the Napa Valley Subbasin Groundwater Sustainability Plan (GSP) and multi-benefit stormwater project opportunities that include this

¹ State Water Resources Control Board, December 2015. (https://www.waterboards.ca.gov/water issues/programs/grants loans/swgp/docs/prop1/swrp finalguidelines d ec2015.pdf)

benefit are prioritized in the *Napa River SWRP*. The effort to create a SWRP for the Napa River Watershed was undertaken by staff of the Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency (NCGSA) and a team of consultants (Project Team) to efficiently use administrative resources in its creation and facilitate integration with their activities.

1.3 WATER QUALITY ISSUES AND REGULATORY REQUIREMENTS

The Napa River Watershed is subject to TMDLs for pathogens and sediment. Compliance with TMDLs and applicable stormwater permits was a major driver informing the selection, evaluation, and prioritization of SWRP projects.

NCSPPP member agencies (identified in **Section 2.1**) are Permittees subject to the Phase II Small Municipal Separate Storm Sewer System (MS4) General Permit (Phase II MS4 Permit) (Order 2013-0001-DWQ).² This stormwater permit is commonly known as the Phase II MS4 Permit and is issued by the State Water Board and overseen by San Francisco Bay Regional Water Board (Regional Water Board).

Under the current Phase II MS4 Permit, Permittees also need to implement the TMDL for Polychlorinated Biphenyls in San Francisco Bay³ and San Francisco Bay Mercury TMDL⁴ which include wasteload allocations (WLAs) for these pollutants. The specific requirements are included within the NPDES Permit provisions and attachments.

The Phase II MS4 Permit also recognizes the following:

Finding 1. Storm water is a resource and an asset and should not be treated as a waste product. Managing rainwater and storm water at the source is a more effective and sustainable alternative to augmenting water supply, preventing impacts from flooding, mitigating storm water pollution, creating green space, and enhancing fish and wildlife habitat. California encourages alternative, innovative, multi-objective solutions to help use and protect this valuable resource, while at the same time controlling pollution due to urban runoff.

The Napa River Watershed includes the Napa Valley Subbasin, which was identified as a high-priority groundwater basin in the Sustainable Groundwater Management Act (SGMA). SGMA was codified in Section 10720 et seq. of the California Water Code in 2015 and provides a framework for the sustainable management of groundwater resources. Through the establishment of the NCGSA and the development of the GSP for the Napa Valley Subbasin, funding and financing sources, including potential fees, will be developed to cover the costs of implementation in order to achieve the GSP's groundwater sustainability objectives, which include projects focused on groundwater recharge.

The *Napa River SWRP* identifies project opportunities that reduce stormwater runoff in order to reduce pollutants in stormwater discharges, increase infiltration, recharge groundwater,

⁴ https://www.waterboards.ca.gov/sanfranciscobay/water_issues/programs/TMDLs/sfbaymercurytmdl.html

⁵ Napa Valley Subbasin Groundwater Sustainability Plan (2022)

improve flood control, and protect receiving water quality. These project opportunities include GI projects, which can be used to catch, infiltrate, and treat stormwater runoff and have benefits across multiple pollutant categories, and projects with groundwater recharge benefits. The multi-benefit project opportunities identified in the SWRP are consistent with and will contribute toward compliance with applicable water quality regulations, including the Phase II MS4 Permit, the GSP, and TMDLs.

1.4 ORGANIZATION OF THE SWRP

This SWRP is composed of the following Sections:

Section 2: Coordination and Collaboration

This section describes entities involved in the development of the SWRP and the relationship of this SWRP to other regional plans.

Section 3: Napa River Watershed Characterization

This section describes the watershed and groundwater subbasin delineations within the Napa River Watershed, jurisdictional borders, as well as the general quality of surface waters within the watershed.

Section 4: Water Quality Concerns and Regulatory Requirements

This section identifies water quality concerns and regulatory requirements within the Napa River SWRP planning area and identifies how the Napa River SWRP addresses compliance with the applicable permits and plans.

Section 5: Identification, Quantification of Multiple Benefits, and Prioritization of **Projects**

This section describes the methodology and analytical processes used to identify existing and potential project opportunities within the Napa River SWRP planning area. This section also provides a quantitative and qualitative description of multiple benefits of potential project opportunities, and the results of the prioritization process based on multiple benefits used to rank the potential project opportunities. Although potential project opportunities have been identified as part of the development of the Napa River SWRP, implementation of specific potential projects must pass through a detailed municipal planning process by the responsible entity.

Section 6: Education, Outreach, and Public Participation

This section describes education, outreach, and public participation opportunities to engage the public implemented through the development period of the SWRP.

Section 7: Implementation Strategy for SWRP

This section describes the implementation strategy and schedule, and includes a discussion of tools, project resources, and funding and engagement opportunities for supporting the implementation of the Napa River SWRP.

2 COORDINATION AND COLLABORATION

2.1 ENTITIES INVOLVED IN PLAN DEVELOPMENT

The Napa River SWRP was prepared by a consultant team engaged by the NCSPPP and NCGSA on behalf of Napa County, the Napa County Flood and Water Conservation District, and the five incorporated cities and town within Napa County.

The NCSPPP is a joint effort of the County of Napa; the cities of American Canyon, Napa, St. Helena, and Calistoga; and the Town of Yountville.

The NCGSA was established in 2019 by the Napa County Board of Supervisors and consists of the five Napa County supervisors. The NCGSA formed a Groundwater Sustainability Plan Advisory Committee (GSPAC) with 25 stakeholder members in 2020 to oversee the development of the GSP.

2.2 COORDINATION OF COOPERATING ENTITIES AND STAKEHOLDERS

Key groups identified for participation in the SWRP development process include the NCSPPP member agencies, the NCGSA, non-municipal public landowners, watershed groups and other non-governmental organizations, Bay Area Integrated Regional Watershed Management Group, and the general public. Engagement and coordination with each of these participant groups is described in Section 6.

2.3 RELATIONSHIP WITH EXISTING PLANNING DOCUMENTS

2.3.1 San Francisco Bay Area Integrated Regional Water Management Plan

The San Francisco Bay Area Integrated Regional Water Management Plan (IRWMP)⁶ is a ninecounty effort to coordinate and improve water supply reliability, protect water quality, manage flood protection, maintain public health standards, protect habitat and watershed resources, and enhance the overall health of the San Francisco Bay. The IRWMP outlines the Region's water resources management needs and objectives and presents innovative strategies and actions to help achieve the objectives. The IRWMP divides the San Francisco Bay Area into four sub-regions East, West, South, and North. Member agencies of NCSPPP are within the North sub-region, which also includes Marin County, Solano County, and Sonoma County. The IRWMP has a Coordinating Committee that serves as the governing body for the Plan, providing oversight of the process, guiding development, and supporting implementation. The IRWMP has a wide range of stakeholders including water supply, water quality, wastewater, stormwater, flood control, watershed, municipal, environmental, and regulatory groups.

2.3.2 Napa Valley Subbasin Groundwater Sustainability Plan

The NCGSA was created in December 2019 to manage groundwater resources for the Napa Valley Subbasin. The NCGSA coordinated with state agencies during the development of the

NCSPPP and NCGSA NAPA RIVER WATERSHED STORMWATER RESOURCE PLAN

⁶ http://bayareairwmp.org/

⁷ Napa Valley Subbasin Groundwater Sustainability Plan (2022)

GSP. The GSP was designed to provide a detailed plan for the Napa Valley Subbasin to achieve and maintain the long-term sustainability of its groundwater resources.

The GSP includes information about regulatory requirements, the geographic setting of the plan area, monitoring and management programs in the plan area, the geologic and hydrogeologic setting of the Napa Valley Subbasin, groundwater and surface water conditions, water supply and demand, a detailed water budget, and projects and management actions that can be implemented to avoid undesirable results. These sections, along with a plan implementation budget and schedule, can be reviewed in detail in the Napa Valley Subbasin GSP. The NCGSA is involved in the Napa River SWRP development process and projects that involve benefits to both groundwater and surface water will be considered in this SWRP.

2.3.3 Other Plans

The potential project opportunities identified in the Napa River SWRP are expected to be an essential part of NCSPPP member agencies strategy to meet the TMDL and Phase II mandated water quality improvement goals. The Napa River SWRP incorporates water quality metrics into the process of selecting project opportunities, prioritizing them, and evaluating their benefits. County jurisdictions and stakeholders will ultimately have the option of pursuing future implementation grant funding for multiple benefit project opportunities included in the SWRP and other planning documents. Other documents considered in the Napa River SWRP development include the St. Helena Urban Watershed Management Plan, the American Canyon Urban Water Management Plan, the Napa County General Plan, the City of Napa Urban Water Management Plan, the Napa County Groundwater Sustainability –Annual Report -- Water Year 2021, the St. Helena Five-Year Capital Improvement Plan, the American Canyon Capital Improvement Plan, and the Napa County Capital Improvement Plan.

2.3.4 Design Criteria for New and Redevelopment BMPs

Guidance for the design of bioretention facilities for development and redevelopment projects is available in the BASMAA Post-Construction Manual – Design Guidance for Stormwater Treatment and Control for Projects in Marin, Sonoma, Napa and Solano Counties⁸, and subsequent updates of this manual. This manual describes stormwater quality requirements for the County including those from the Phase II MS4 Permit issued in 2013. The manual provides instructions for developing a project stormwater control plan, as well as how to size stormwater treatment facilities to meet requirements.

⁸ Bay Area Stormwater Management Agencies Association (BASMAA) (2019)

NAPA RIVER WATERSHED CHARACTERIZATION

3.1 SWRP AREA

The SWRP planning area consists of the Napa River Watershed in Napa County, which includes the Napa Valley Subbasin, as defined in the Napa GSP. The Napa River Watershed, which drains to the San Pablo Bay Watershed, is one of three major watersheds in Napa County (Figure 1).9 The watershed and subbasin are shown in **Figure 2**.

Figure 1. Major Napa County Watersheds from the Napa County General Plan (2008)

⁹ Napa County General Plan (2008)

Figure 2. Napa River Watershed and Napa Valley Subbasin Boundaries from the Napa Valley Subbasin Groundwater Sustainability Plan (2022)

3.2 NAPA COUNTY WATER SUPPLIERS

Incorporated areas in the watershed utilize local reservoirs and regional water providers to supply water to residents in Napa County, while unincorporated areas rely mostly on groundwater and surface water resources. 10 The water utilities in Napa County include American Canyon Utility Water, California Department of Veterans Affairs, Calistoga Water Service District, City of Napa Water Division of the Utilities Department, Congress Valley Water District, Los Carneros Water District, and Yountville Water Service District. 11

3.3 STORMWATER, GROUNDWATER, AND WATERSHED MANAGEMENT **ACTIVITIES**

NCSPPP is a joint effort of the County of Napa; the cities of American Canyon, Napa, St. Helena, and Calistoga; and the Town of Yountville to prevent stormwater pollution, protect and enhance water quality in creeks and wetlands, preserve beneficial uses of local waterways, and implement state and federal water quality regulations. Collectively and independently, these six municipalities have been taking action to reduce stormwater pollution since 2003, when the first term Phase II MS4 Permit was issued by the State Water Board. Over the years, actions taken by NCSPPP and its members have intensified in response to evolving regulatory requirements and community needs and desires.

The NCGSA was created in December 2019 and manages groundwater resources in the Napa Valley Subbasin in accordance with the SGMA. The NCGSA was required to develop and adopt a GSP for the Napa Valley Subbasin, which has been developed to comply with SGMA and Department of Water Resources requirements. In order to develop the GSP, the GSPAC was formed in June 2020 and was made up of 25 community members. The members of the GSPAC represented beneficial users and uses of groundwater for community, economic, agricultural, and environmental interests within the Subbasin. In addition to the GSPAC, an Ad-Hoc Subcommittee of seven of the GSPAC members worked to identify management tools and policies for groundwater sustainability. 12

3.4 WATER CONSERVATION ACTIVITIES IN THE NAPA RIVER WATERSHED

The 2050 Napa Valley Water Resources Study completed by the Napa County Flood Control and Water Conservation District in 2005 analyzed existing water supply resources and compared them to existing and projected water demand. To project water needs and compare them to supply, "wet" and "dry" years were considered, with wet years generally having enough water for all users, while dry years showed users in both incorporated and unincorporated Napa County would face challenges with water supply. The Napa County General Plan contains policies that are designed to address water supply, conservation, and reuse to meet future water needs. The Napa County General Plan policies support the protection of groundwater and

NCSPPP and NCGSA NAPA RIVER WATERSHED STORMWATER RESOURCE PLAN

¹⁰ Napa County General Plan (2008)

¹¹ https://www.napa.lafco.ca.gov/r maps.aspx

¹² Napa Valley Subbasin Groundwater Sustainability Plan (2022)

surface water resources, while also including policies that expand the use of recycled water to meet future supply demands.

3.5 WATERSHED AND SUBBASIN CHARACTERIZATIONS

3.5.1 Napa River Watershed

The Napa River flows 55 miles from Mount St. Helena to the San Pablo Bay and the watershed area is approximately 245,724 acres. Major land use types within the watershed include forested mountain areas, vineyards, urban areas, open pasture, grasslands, industrial areas, and marshes (**Figure 3**).¹³

Most (~95%) Napa County residents live in the Napa River Watershed in the cities of American Canyon, Calistoga, Napa, and St. Helena; the town of Yountville; and Napa County urban areas (**Figure 4**). As the population of Napa County grows and more development in the Napa River Watershed occurs, the Napa River is subjected to increased water quality stressors. Areas in the watershed have been set aside as protected lands and conservation efforts are a key component of watershed management in the County. ¹⁴ Several groups within the County work together to maintain and improve the health of the watershed through watershed assessments, restoration activities, and monitoring programs, including NCSPPP and the Watershed Information & Conservation Council (WICC). The *Napa River SWRP* will help meet watershed planning objectives, which include reducing flooding, protecting and improving water quality, and identifying multiple-benefit project opportunities that will improve the County's ability to compete for state and federal funding. ¹⁵

3.5.2 Napa Valley Subbasin

The Napa Valley Subbasin, as defined in the Napa GSP, was designated as a high priority basin by the Department of Water Resources due to the importance of groundwater to the region. The Subbasin is approximately 45,900 acres within the Napa River Watershed and includes urban, agricultural, and undeveloped land uses (**Figure 5**).¹⁶ The Subbasin is supplied by surface water, groundwater, and reclaimed water (**Figure 6**) and includes wells that are used for domestic, irrigation/agricultural, public supply, and industrial production. The agencies responsible for water management in the Subbasin are the California Department of Veterans Affairs; the Town of Yountville; the cities of Napa, St Helena, and Calistoga; the Napa Sanitation District; the Napa County Flood Control and Water Conservation District; NCGSA; and Napa County (**Figure 7**).¹⁷

4 WATER QUALITY CONCERNS AND REGULATORY REQUIREMENTS

4.1 POLLUTANT GENERATING ACTIVITIES

The Phase II MS4 Permit recognizes the following:

Finding 2. As human population increases, urban development creates new pollution sources and brings with it proportionately higher levels of car emissions, car maintenance wastes, municipal sewage, pesticides, household hazardous wastes, pet wastes, trash, etc. which can either be washed or directly dumped into the municipal separate storm sewer system (MS4). As a result, the runoff leaving the developed urban area is greater in pollutant load than the pre-development runoff from the same area. Also, when natural vegetated pervious ground cover is converted to impervious surfaces such as paved highways, streets, rooftops, walkways and parking lots, the natural absorption and infiltration abilities of the land are lost. Therefore, runoff leaving developed urban area is significantly greater in runoff volume, velocity, peak flow rate, and duration than pre-development runoff from the same area. The increased volume, velocity, rate, and duration of runoff greatly accelerate the erosion of downstream natural channels. In addition, the greater the impervious cover the greater the significance of the degradation.

Finding 3. Pollutants of concern found in urban runoff include sediments, non-sediment solids, nutrients, pathogens, oxygen-demanding substances, petroleum hydrocarbons, heavy metals, floatables, polycyclic aromatic hydrocarbons (PAHs), trash, pesticides and herbicides.

Finding 4. Trash and litter are a pervasive problem in California. Controlling trash is a priority, because trash adversely affects our use of California's waterways. Trash impacts aquatic life in streams, rivers, and the ocean as well as terrestrial species in adjacent riparian and shore areas. Trash, particularly plastics, persists for years. It concentrates organic toxins, entangles and ensnares wildlife, and disrupts feeding when animals mistake plastic for food and ingest it. Additionally, trash creates aesthetic impacts, impairing our ability to enjoy our waterways.

The SWRP quantifies the water quality benefits of the project opportunities (see **Section 5**). Thus, the SWRP provides tangible water quality benefits to the NCSPPP member agencies and NCGSA and supports other water quality improvement efforts such as the Phase II MS4 Permit, TMDLs, and IRWMP.

In addition, depending on the types of projects selected, the SWRP project opportunities may also support implementation of the Statewide Trash Amendments. The State Water Board has indicated that the following types of BMPs will be considered full capture systems:

- Bioretention
- Infiltration Trench
- Infiltration Basin
- Detention Basin
- Media Filter

Stormwater Capture and Use

4.2 POLLUTANTS OF CONCERN

The pollutants of concern in for the Napa River are pathogens (indicator bacteria – E. coli, fecal coliform, and/or total coliform) and sediment, as identified based on the TMDLs associated with the Napa River. In addition, the Napa River Watershed is subject to the TMDL for Polychlorinated Biphenyls in San Francisco Bay and the San Francisco Bay Mercury TMDL.

4.2.1 Applicable Permits and TMDLs

The NCSPPP member agencies are required to comply with three separate stormwater National Pollutant Discharge Elimination System (NPDES) permits, as applicable to their jurisdictions and activities:

- Phase II MS4 Permit (Order 2013-0001-DWQ) and subsequent amendments and reissuances of this permit;¹⁸
- General Permit for Discharges of Storm Water Associated with Construction Activity (Construction General Permit) (Order 2009-0009-DWQ) and subsequent amendments and reissuances of this permit;¹⁹; and
- General Permit for Discharges of Storm Water Associated with Industrial Activity (Industrial General Permit) (Order 2014-0057-DWQ) and subsequent amendments and reissuances of this permit.²⁰

In addition, as a part of the Phase II MS4 Permit, the NSCPPP member agencies are required to comply with the corresponding TMDL requirements, as specified within the Phase II MS4 Permit and Attachment G, Region-Specific Requirements for Implementation of TMDLs. Compliance with TMDL implementation requirements is documented in the TMDL Implementation Status Report and compliance with the Phase II MS4 Permit is reported within the Annual Reports submitted to the State Water Board.

The Stormwater Permits and TMDLs generally require the municipalities to implement a series of BMPs in order to reduce pollutants from the MS4s. The Stormwater Permits require Permittees to apply BMPs that are effective in reducing or eliminating the discharge of pollutants to the waters of the U.S.

As a part of the overall strategy for the municipal stormwater program, a series of BMPs are implemented in order to comply with the Discharge Prohibitions and Receiving Water Limitations including source controls and/or treatment controls. The *Napa River SWRP* is consistent with and assists in attaining the TMDL WLAs and complying with the applicable NPDES permits since it identifies and prioritizes potential multi-benefit project opportunities, which provide a number of benefits including improvements to water quality (see **Section 5**).

-

¹⁸ https://www.waterboards.ca.gov/water issues/programs/stormwater/phase ii municipal.html

¹⁹ https://www.waterboards.ca.gov/water issues/programs/stormwater/constpermits.html

²⁰ https://www.waterboards.ca.gov/water issues/programs/stormwater/igp 20140057dwq.html

Provision E.15 of the Phase II MS4 Permit requires the Permittees in Napa County to comply with all applicable TMDLs approved pursuant to 40 Code of Federal Regulations section 130.7 that assign a WLA to the Permittee and that have been identified in Attachment G of the Phase II MS4 Permit.

Table 1. Napa County Phase II Areas with Water Bodies that Have Approved TMDLs

NCSPPP	County of Napa City of American Canyon City of Calistoga City of Napa	Napa River	Napa River: Pathogens (Indicator Bacteria) (<i>E. coli</i> , Fecal coliform, Total coliform) Resolution No. R2-2006-0079
	City of St. Helena Town of Yountville		Napa River: Sediment Resolution No. R2-2009-0064

Note:

[a] Source: Phase II MS4 Permit, Attachment G – Region Specific Requirements

SGMA became effective in 2015 and encourages groundwater management at the local level through the creation of GSAs to develop GSPs to sustainably manage groundwater basins. The NCGSA was formed in 2019 and the Napa GSP was adopted in January 2022. Following the adoption of the GSP, the NCGSA formed a Technical Advisory Group to advise the NCGSA on implementation of the GSP.²¹

4.3 NAPA COUNTY WATER QUALITY COMPLIANCE STRATEGIES AND THE SWRP

A broad array of actions including the implementation of GI and source control efforts is expected to be required to achieve sediment and pathogen WLAs and improve water quality. The potential project opportunities identified in the *Napa River SWRP* are expected to be an essential part of Napa County Permittees' strategy to meet the TMDL and Phase II MS4 Permit mandated water quality improvement goals. The *Napa River SWRP* incorporates water quality metrics into the process of selecting project opportunities, prioritizing them, and evaluating their benefits. A primary goal for this *Napa River SWRP* was to identify multi-benefit potential project opportunities that could be leveraged as both GI and groundwater projects.

Multi-benefit projects are expected to have a broad effect on water quality and watershed health due to resulting reductions in runoff and sediment loads and groundwater recharge. Reduction of runoff through infiltration disrupts the delivery of pollutants, including sediment, to the storm drainage system and water bodies. Implementation of these projects reduces runoff volumes entering storm drain infrastructure and peak flow rates, which is a factor in modification of physical characteristics of streams. The multi-benefit project opportunities identified in the SWRP, such as GI and groundwater recharge-focused projects, can reduce

_

²¹ Napa Valley Subbasin Groundwater Sustainability Plan (2022)

surface water pollution and flooding, increase groundwater sustainability, and support perennial stream channel conditions.

5 IDENTIFICATION, QUANTIFICATION OF MULTIPLE BENEFITS, AND PRIORITIZATION OF PROJECT OPPORTUNITIES

5.1 OVERVIEW OF APPROACH

Napa County stakeholders participated in a multi-step identification, quantification, and prioritization process to identify planned and potential project opportunities. Overall, the methodology included the steps described below, and as outlined in **Figure 8**.

- Identify projects Planned and potential future projects were provided by stakeholders and a request for other planned multi-benefit projects is provided as an attachment to this document. Additional potential project locations were identified and catalogued by using a Geospatial Information System (GIS)-based opportunity analysis.
- Score projects using an automated metrics-based evaluation As required by the SWRP Guidelines, the potential project opportunities were classified and scored using a quantitative metrics-based multiple benefit evaluation. The scoring was automated for all potential project opportunities using metrics derived from available data.
- 3. Rank projects based on weighted benefits Following the summation of raw total scores based on the metrics-based evaluation, the projects were ranked using an equal-weight distribution for the benefit categories.

The methodologies used to complete these steps are further described in the following sections. These methodologies were developed and used to rank potential project opportunities based on several criteria featuring a multiple benefit evaluation. Outside the scope of the *Napa River SWRP*, the development and implementation of specific stormwater capture and use projects would undergo separate municipal planning, permitting, and environmental review processes following technical and design criteria by the responsible entity.

Figure 8. Approach Overview Flowchart

5.2 IDENTIFICATION OF PROJECT OPPORTUNITIES

5.2.1 Planned Project Opportunities

To identify planned project opportunities throughout the Napa River Watershed, the Project Team requested information regarding projects planned by a jurisdiction, watershed group, or other stakeholders. Stakeholders were asked to identify planned project opportunities that met two or more of the SWRP multiple benefits and submitted project information to the Project Team. These projects were documented in a spreadsheet that was sent out to stakeholders and Permittees in the region. The request for information included a spreadsheet structured to enter specific information about the planned projects including the project proponent, project location, facility type and drainage area, project planning phase, project scale, benefits achieved, and facility sizing.

5.2.2 Potential Project Opportunities

The stakeholders and the Project Team participated in a GIS-driven desktop screening process to identify potential project opportunities in public rights-of-way and public parcels according to the criteria developed through the optimization and prioritization assessment.

A desktop project opportunity analysis was conducted in GIS to identify locations for potential project opportunities. The desktop GIS analysis consisted of a multi-criteria screening process. Additional details of the screening process for identifying potential projects on publicly-owned parcels and rights-of-way (ROW) are described below.²²

- 1. Identified publicly-owned parcels through parcel ownership and/or tax-exempt status (although tax-exempt religious facilities may be excluded from consideration).
- 2. Screened publicly-owned parcels from Step 1 to isolate parcels that are at least 0.1 acres in size and with average slope less than 10% (estimated using USGS topographic data).
- 3. Parcels meeting Step 2 screening criteria were assessed for physical feasibility constraints that could preclude project implementation. Parcels that did not meet size, slope, and feasibility screening criteria were not considered as project opportunity sites.
- 4. Identified non-interstate highway public ROW within urban areas. Roadways considered in Step 3 included state and county highways and connecting roads; and local, neighborhood, and rural roads.
- 5. Identified land uses or adjacent land uses based on a combination of Association of Bay Area Governments (ABAG) land use categories and use codes provided by the Napa County Assessor. These land uses were combined into specific land use categories for use in the analysis.

²² This analysis did not include screening checks that should occur as part of a project concept development, which include the need for a liner due to proximity to structures and other feasibility checks. The screening also did not include field checks that would be conducted as part of project design, such as drainage tie-ins, land use checks, or other data verification.

5.2.3 Data Solicitation and Standardization

Spatial data (GIS data, computer aided design [CAD] data, or Google Earth files) were needed to identify potential opportunities using a desktop analysis and to characterize the site suitability for project implementation. To meet the data needs for the GIS-based screening analysis, spatial data layers for the planning area were identified. The data needs are described in **Table 2**, along with data obtained from publicly available sources. These GIS datasets, which formed the basis for the opportunity analysis and hydrologic modeling efforts, were standardized across the County in Environmental Systems Research Institute (ESRI) geodatabase format.

5.3 PROJECT CLASSIFICATION

All projects (i.e., those identified in the GIS opportunity analysis and the stakeholder planned projects) were classified to conduct the metrics-based evaluation (see Section 5.5). The projects were classified based on the following information:

- Project type;
- 2. Infiltration and recharge feasibility;
- 3. Land use type;
- 4. Drainage area information.

As part of this step, potential project locations that were identified in the GIS analysis may have been manually altered to better reflect practical concerns (e.g., multiple small co-located parcels may be grouped into one potential project location; clearly infeasible project locations may have been removed).

5.3.1 Green Infrastructure Projects

Green infrastructure projects were categorized as parcel-based, regional, or ROW/green street projects.

- All street-based projects were identified as ROW/green street projects.
- 2. Projects located on a parcel were classified as regional if:
 - a. Minimum parcel size of at least 0.5 acre;
 - b. Parcel within a MS4 boundary; and
 - c. At least 50% of the parcel is pervious or undeveloped.
- 3. All other parcel locations were identified as parcel-based projects.

5.3.2 Infiltration Feasibility

All potential project locations were categorized as infeasible, partially feasible, or feasible for infiltration, as follows:

- 1. Hazardous/infeasible for infiltration (i.e., facilities must be lined) projects that are located:
 - a. In any portion, over geotechnical hazard areas (e.g., landslides, liquefaction hazards, other available information);
 - b. Mostly over known soil contamination or groundwater contamination plumes; or
 - c. Within 100 feet of a site with soil or groundwater contamination (based on proximity to active Geotracker55 or EnviroStor56 sites).
- 2. Infiltration safe but only partially feasible This is the case when none of the above constraints exist, but the soil underlying the facility is relatively poorly draining (identified as hydrologic soil group C or D).
- 3. Infiltration feasible; not suitable for groundwater recharge The site has none of the infiltration hazards present and the soil underlying the facility is relatively well draining (identified as hydrologic soil group A or B), but does not meet criteria for groundwater recharge.
- 4. Groundwater recharge feasible Groundwater recharge is feasible if infiltration is feasible and the following conditions are satisfied: surficial and subsurface soil provide sufficient permeability, reliable hydrogeologic connectivity to aquifer, sufficient groundwater storage available, and vadose zone/soil quality are acceptable.

5.3.3 Land Use Type

Potential project opportunities were assigned land use types based on the 2005 ABAG Land Use²³ classification for the San Francisco Bay Region. This land use dataset was chosen due to its use in the development of the Regional Watershed Spreadsheet Model (RWSM) developed to estimate average annual regional and sub-regional scale loads for the San Francisco Bay Area.²⁴ The following land use groups were identified for each potential project opportunity:

- Agricultural/open space;
- Industrial (old);
- New urban;
- Commercial (old);
- Residential (old);
- Transportation (old); and
- Water.

5.3.4 Project Drainage Area

For each identified project, the project drainage area was identified and characterized as follows:

- 1. All planned projects with identified drainage areas were characterized as provided.
- 2. For ROW projects for which drainage area has not been characterized, the roadway and an assumed tributary width (e.g., 50 feet per side) that extends into the adjacent parcels was considered the project drainage area.
- 3. For parcel-based projects for which drainage area has not been characterized, the entire parcel was assumed to make up the drainage area.
- 4. For regional projects for which the drainage area has not been characterized, the drainage area characterization (i.e., slope and land use) was roughly approximated.

5.4 IDENTIFIED PROJECT DATABASE

The projects identified and classified using the methods described above were compiled into a database that includes all of the project information that was provided (for planned projects) as well as information identified for project opportunities as part of the GIS screening process.

Following the compilation of identified projects, additional information was gathered for each project through a desktop analysis. This information was then used to score the identified

²³ Association of Bay Area Governments (ABAG), 2006. Existing Land Use in 2005: Data for Bay Area Counties. Oakland, California USA

²⁴ Regional Watershed Spreadsheet Model (RWSM), 2018. San Francisco Estuary Institute, Richmond, California. https://www.sfei.org/projects/regional-watershed-spreadsheet-model

project opportunities. A thorough description of the scoring process is found in the sections that follow.

5.5 METRICS-BASED MULTI-BENEFIT EVALUATION AND PROJECT PRIORITIZATION

The planned projects and project opportunities included in the project database were evaluated using an automated scoring process based on quantitative metrics that account for multiple benefits, as described in this section. The automated process requires that scoring metrics are contained in the identified project database. The scoring scheme described below was adapted from the method used to develop the Stormwater Resource Plan for San Mateo County²⁵ (SMCWPPP, 2017), the Ventura Countywide Municipal Stormwater Resource Plan²⁶, Storm Water Resource Plan for Alameda Countywide Clean Water Program²⁷, and Contra Costa Watersheds Stormwater Resource Plan²⁸ and is consistent with the SWRP Guidelines²⁹. The quantitative metrics and qualitative components that are scored are associated with providing the multiple benefits identified in the State's SWRP Guidance (general suitability, water quality, water supply, flood control, environmental benefit, and community benefit), derived from the implementation of the project.

After scoring planned projects and project opportunities, the project database was provided to the stakeholders for review. The raw scores from the multi-benefit evaluation were generated from the preliminary project ranking. A weighted score was applied to the raw scores to equally distribute each of the multiple-benefit categories. **Appendix E** provides the ranked project database.

5.5.1 Multiple Benefit Evaluation

Using the information compiled in the identified project database, each project received a total and weighted score using the metrics-based point system provided in **Table 3**. There are six multiple benefit categories, which include general suitability, water quality, water supply, flood control, environmental, and community benefits. The total score for each benefit category is based on the following performance factors:

- General Suitability:
 - Parcel Area (For Regional and Parcel-Based Projects Only) This scoring component provides more points for larger parcel areas, assuming that it would be easier to site a project on a larger parcel.

²⁵ San Mateo County Stormwater Resource Plan (2017)

²⁶ Ventura Countywide Municipal Stormwater Resource Plan (2016)

²⁷ Alameda Countywide Clean Water Program Storm Water Resource Plan (2019)

²⁸ Contra Costa Watersheds Stormwater Resource Plan (2019)

²⁹ State Water Resources Control Board, December 2015.

⁽https://www.waterboards.ca.gov/water issues/programs/grants loans/swgp/docs/prop1/swrp finalguidelines dec2015.pdf)

- Opportunity Location Slope This scoring component is related to ease of construction and implementation. Flatter locations typically require less grading and hydraulic connection considerations.
- Infiltration Feasibility Retention of runoff through percolation or infiltration is known to provide enhanced pollutant reduction, reestablishment of natural drainage, recharge potential, and reduction of runoff rates, among other beneficial outcomes. This project component is assumed to apply to all benefit categories.
- Proximity to Existing Infrastructure This scoring component weights more points for projects near existing storm drains.

Water Quality:

- PCBs/Mercury Yield Classification in Project Drainage Area This scoring component is related to the influent pollutant loads determined through the RWSM (Section 5.3.3). Facilities that are located in areas with higher pollutant loading rates for PCBs and mercury have greater potential to reduce loads. Points are specific to water quality. An additional point is awarded for projects with a known source property within the drainage area.
- Regional Facility One additional point is awarded for regional projects, as these projects would remove a larger pollutant load than a parcel-based or ROW project.
- Removes Urban Pollutant Loads from Stormwater Points (specific to water quality) are provided to facilities designed as GI or treatment control facilities.
- Improves Groundwater Quality Points are provided to facilities that improve groundwater quality in areas with historical exceedances of constituents of concern.

Water Supply:

- Augments Water Supply Increasing points (specific to water supply) are received based on potential water supply provided. Projects located over infiltrating soils and overlying potential water supply aquifers that promote infiltration are given one point, while stakeholder projects that are specifically designed to augment water supply will be given two points.
- Augments Groundwater Supply Points are provided to facilities that augment groundwater supplies; extra points are provided to facilities that enhance groundwater levels in critical areas (e.g., interconnected surface water or for shallow domestic wells).

• Flood Control:

 Provides Flood Control Benefits – Stakeholder flood control facilities receive points specific to providing flood control benefits. Green infrastructure projects (fully or partially infiltrating) are assumed to provide some flood control benefits, while projects specifically designed to address flooding issues are given more points.

• Environmental:

- Re-establishes Natural Water Drainage Systems or Develops, Restores, or Enhances Habitat and Open Space – Hydromodification control, stream restoration, and habitat restoration stakeholder projects receive points specific to providing environmental benefits. Fully and partially infiltrating green infrastructure projects are given one point for providing hydrologic benefit.
- Ecosystem and Interconnected Surface Water Enhancements Points are provided to facilities that increase groundwater availability for groundwaterdependent ecosystems (GDEs) and interconnected surface waters (ISWs).

• Community:

- Provides Community Enhancement Stakeholder projects that specifically provide public use areas or public education components are given points specific to providing community benefits.
- Disadvantaged Community Benefits Points are provided to facilities that improve conditions in disadvantaged and severely disadvantaged communities (DACs and SDACs) and economically distressed areas (EDAs).

Table 3. Project Metrics-Based Multi-Benefit Scoring

Benefit	Project Component	Points		
Addressed		0	1	2
General Suitability	Parcel Area (for Regional and Parcel-Based projects only)	< 1 acre	1 - < 4 acres	> 4 acres
General Suitability	Location Slope	7-10%	3-7%	0-3%
General Suitability	Infiltration Feasibility	No/Partial	Infiltration Only	GW Recharge
General Suitability	Proximity to existing infrastructure	Greater than 500 feet from a storm drain		Less than 500 feet from storm drain
Water Quality	PCBs Yield Classification in project area ¹	New Urban Agriculture/Open Space, or Other	Old Urban	Old Industrial or Source Property (+1)
Water Quality	Mercury Yield Classification in project area	New Urban	Source Property, Old Industrial, Old	Agriculture/ Open Space

Benefit	Desirat Commonwell	Points			
Addressed	Project Component	0	1	2	
			Commercial, Old Residential		
Water Quality	Regional Facility		Yes		
Water Quality	Removes urban pollutant loads from stormwater	Outside urbanized area		Inside Urbanized Area	
Water Quality	Improves groundwater quality in areas with historical exceedances of constituents of concern	No expected benefit, project located in areas with water quality concerns	No expected benefit, project is not located in close proximity of areas with water quality concerns	Directly benefits areas of GW quality concern	
Water Supply	Augments Water Supply		Infiltrating Green Infrastructure or Infiltrating Flood Control Project over Potential Water Supply Aquifer	Harvest/Use or Other Water augmentation project ²	
Water Supply	Project is in critical areas with GW level depression or for shallow domestic wells.		Overall enhancement of water levels in the basin	Overall enhancement of groundwater levels in a local area ²	
Flood Control	Provides Flood Control Benefits	Does not provide flood control benefits	Provides flood control benefits by reducing runoff and increasing infiltration and recharge	Provides flood control benefits in high-risk flood zones	
Environmental	Re-establishes natural water drainage systems		Fully and Partially Infiltrating Green Infrastructure Project	Stream Restoration or Hydromodification Control ²	
Environmental	Develops, restores, or enhances habitat and open space		Green Infrastructure Project	Habitat Restoration Project ²	

Benefit	Project Component	Points		
Addressed		0	1	2
Environmental	Increases GW availability for groundwater- dependent ecosystems (GDEs) and interconnected surface waters (ISWs)			GW recharge project implemented in areas directly improving GDE habitat and ISW connectivity
Community	Provides enhanced or created recreational and public use areas with potential opportunities for community involvement and education		Green Infrastructure project	Public Use Area or Public Education Project Component ³
Community	Provides community benefits in Disadvantaged Communities	-		Project is in DAC/SDAC/EDA areas

Notes:

- Includes parcel yield classification for parcel-based projects; drainage area yield classification for regional projects; and adjacent
 parcel yield classification for ROW projects. Scores will be weighted on the portion of the drainage area in each yield classification.
- 2. As identified by the project proponent.
- 3. Defined as providing "enhanced or created recreational and public use areas, community involvement, or employment opportunities" per the State Storm Water Resource Plan Guidelines (State Water Board, 2015) per Permittee/Stakeholder project information. Includes enhancement of existing public use areas or added project features.

5.5.2 Prioritized List of Project Opportunities

Through the methodologies described in this section, the stakeholders identified, quantified the potential for multiple benefits, and ranked a comprehensive list of potential project opportunities. A weighted score was calculated for each parcel or ROW by summing the total score by benefit category multiplied by a weighting factor. Each benefit category was equally weighted. **Figure 9** and **Figure 10** show the location of project opportunities ranked by weighted score for parcel-based and ROW/green street projects. The list of prioritized projects, ranked based on the weighted score, and maps showing the location of top priority projects can be found in **Appendix E**.

Figure 9. Parcel-based Project Opportunities in the Napa River Watershed

Figure 10. ROW/Green Streets Project Opportunities in the Napa River Watershed

6 EDUCATION, OUTREACH, AND PUBLIC PARTICIPATION

Note to reviewers: highlighted sections will be modified following completion of the public participation process.

6.1 OVERVIEW OF STAKEHOLDER OUTREACH AND COORDINATION STRATEGY

The stakeholder outreach and coordination strategy, summarized below, was implemented as described in the document entitled *Napa River Watershed Stormwater Resource Plan Outreach Strategy* (Outreach Strategy) (**Appendix C**).

6.1.1 Purpose of the Stakeholder Outreach and Coordination Strategy

Water Code Section 10562(b)(4) requires that the SWRP provide for community participation in SWRP development and implementation, and SWRP Guidelines state the following regarding public outreach requirements:

"To maximize community-based benefits, key stakeholders and the public should be involved in all appropriate implementation steps of the Storm Water Resource Plan. Public education and opportunities for public participation in actions, decisions, and projects implemented through watershed-based storm water management should be provided."

This strategy is focused on meeting the required element and the overall intent of the Water Code to engage stakeholders and the public in the SWRP development and implementation processes.

6.1.2 Outreach Approach

The outreach strategy for the Napa SWRP focused on key stakeholders through targeted messages for each stakeholder audience and use of efficient/effective methods to deliver the message to each stakeholder audience. This approach was implemented for the SWRP development phase. Implementation of the *Napa River SWRP* will be conducted by the various jurisdictions within Napa County through the NCSPPP and the agencies and advisors participating in the GSA, as well as other local stakeholders and groups. **Section 6.1.3** identifies the targeted key stakeholder audiences and their potential interest in the project. **Section 6.1.4** provides a matrix linking the key stakeholder audiences and method(s) used to deliver the message and includes the outreach schedule. Targeted messages for each audience were developed and refined during the outreach campaign.

6.1.3 Key Stakeholder Audiences

Outreach activities were focused on key stakeholder audiences, as described in the following sub-sections.

6.1.3.1 SWRP Participating Agencies

The primary stakeholders in the development of the SWRP are the SWRP participating agencies who include Napa Valley municipalities, Napa County Flood Control and Water Conservation District, NCGSA, and GSA advisors.

6.1.3.2 Non-Municipal Public Landowners

This stakeholder audience is composed of those non-municipal entities that own public lands and easements that are potential partners for multiple-benefit projects. This group includes school districts, park districts, water agencies, transportation/transit districts, and private utilities. This stakeholder group was identified by sorting the *Napa River SWRP* project opportunities database for landowners with parcels that are greater than four acres in size. A list of landowners in this group is provided in Attachment A to the Outreach Strategy (**Appendix C**). Developing projects or partnerships with landowners in this group may have the added benefit of assisting with their stormwater compliance requirements (e.g., Caltrans, Phase II non-traditional permittees).

6.1.3.3 Watershed Groups and Other Non-Governmental Organizations

The SWRP Guidelines emphasizes the importance of collaboration with non-governmental organizations (NGOs) during the SWRP development. Napa County has numerous organizations engaged in watershed and creek protection and improvement. These organizations are listed in the Outreach Strategy (**Appendix C**).

In addition to creek and watershed organizations, because of the potential multi-benefit use of agricultural lands for groundwater recharge, the Napa County Resource Conservation District and the Napa County Farm Bureau represent additional stakeholders for the SWRP outreach effort.

6.1.3.4 Bay Area Integrated Regional Watershed Management (IRWM) Plan

Although the IRWM group is not considered a stakeholder, the group was included in initial outreach efforts to inform this group that the *Napa River SWRP* was being developed and ultimately would be submitted to the IRWM group so that the SWRP projects can be included in the Bay Area IRWM Plan.

6.1.3.5 General Public

The SWRP Guidelines require that opportunities be provided for community participation in SWRP development and implementation. While this can be largely achieved through the above identified stakeholder audiences, some of the outreach focus was general to provide opportunities for interested individuals who do not identify with specific groups to participate. Community members with interest in project design and implementation that enhance community benefits were invited to provide feedback on the SWRP development.

6.1.4 Matrix of Outreach Methods

The strategy employed for efficient, cost-effective outreach capitalized on outreach methods that disseminated information to each stakeholder audience relying on cost effective methods

already in use by NCSPPP and the NCGSA. **Table 4** provides a matrix relating each of the stakeholder audiences to the recommended outreach method.

Table 4. Matrix of Stakeholder Audience and Outreach Methods

Stakeholder Audience	Outreach Method
SWRP Participating Agencies	MeetingsMailing List
Non-Municipal Public Landowners	Email List/Targeted MessagesGeneral FlyerSWRP Webpage
Watershed Groups and NGOs	 Email List/Targeted Messages General Flyer SWRP Webpage Targeted Social Media Messages
Bay Area IRWMP	 Targeted Email Messages Presentation at Bay Area IRWMP Meeting or Discussion with Subgroup Contract
General Public	SWRP WebpageTargeted Social Media Messages

Outreach materials were distributed to the public according to the schedule in **Table 5**.

Table 5. Public Outreach Schedule

Task	Date
Initial messaging to email lists	TBD
SWRP availability alert to email lists	TBD
SWRP announcement posted on websites and social media pages	TBD

6.2 SUMMARY OF OUTREACH ACTIVITIES

Stakeholder outreach and coordination activities were conducted pursuant to the SWRP Guidelines and reflect the outreach and coordination strategy described in Section 6.1, above.

6.2.1 Email List and Targeted Email Messages

Emails with messages specific to targeted stakeholder groups were sent via existing email distribution lists that were developed as described in the Outreach Strategy. The emails were sent to notify stakeholders that the Draft SWRP was posted on the Napa County Groundwater Sustainability Program's website for public review and comment. Messages sent to the stakeholders are provided in **Attachment B** in **Appendix C**.

6.2.2 General Flyer

A flyer containing general information about the SWRP development was attached to emails sent to non-municipal public landowners and watershed groups/NGOs. The flyer is provided as **Attachment C** in **Appendix C**.

6.2.3 SWRP Webpage

Working with the County of Napa and webmaster, a stormwater resource plan information page was created to provide general information on the SWRP and to serve as the landing place for stakeholder audiences to obtain information, submit projects, or request to be added to the stakeholder list. Key information including the project, schedule, and posting the SWRP for public review was provided on the webpage. A screen shot of the web page is provided in Attachment D in Appendix C.

Information submitted by interested parties, including contact information, feedback on the Draft SWRP, and projects submitted by interested parties, was compiled and routed back to NCSPPP and the NCGSA for subsequent follow-up. Comments on the Draft SWRP are summarized in Appendix D.

6.2.4 Social Media

Working with the County of Napa public information officer, messages and content for social media announcements were developed. This information was posted to the County of Napa's Facebook page and Twitter feed.

6.2.5 Bay Area IRWM Group

An email was sent to the Bay Area IRWM group providing notification that the SWRP was being developed and would ultimately be submitted to the IRWM group for inclusion in the IRWM Plan.

The final SWRP was submitted to the Bay Area IRWMP in December 2022.

7 IMPLEMENTATION STRATEGY FOR SWRP

Implementation of the *Napa River SWRP* will include both project implementation and adaptive management on a watershed- and project-level basis. Successful implementation of the *Napa River SWRP* plan requires continued stakeholder engagement, coordination with efforts to comply with water quality regulations, as well as specific actions for individual project implementation, such as obtaining necessary environmental permits, and identifying and obtaining funding resources.

7.1 SWRP IMPLEMENTATION

7.1.1 Responsible Entities

NCSPPP and the NCGSA are the primary developers and coordinators of the *Napa River SWRP* on behalf of the stakeholders. It is expected that the NCSPPP member agencies identified on the prioritized project opportunity list will be responsible for the development and implementation of those projects, should funding become available.

NCSPPP and NCGSA will facilitate future *Napa River SWRP* updates and ongoing adaptive management of the *Napa River SWRP*, unless this task is taken on by another entity. It is also anticipated that the NCSPPP and NCGSA will fund *Napa River SWRP* updates to the extent feasible with support from NCSPPP member agencies. The NCSPPP and NCGSA member agencies regularly meet to coordinate and discuss the implementation of water quality programs. These regular meetings will periodically include discussions of *Napa River SWRP* updates when needed, such as during the SWRP updates once every five years.

Project implementation will depend on funding availability. Through its capital improvement and planning process, each municipality is will refine the list of prioritized project opportunities for further development. Municipalities may develop partnerships with other agencies or entities to support project planning and implementation.

7.1.2 Implementation Schedule

The final *Napa River SWRP* will be submitted to the Bay Area Integrated Regional Water Coordinating Committee for incorporation into the Bay Area IRWMP. It is anticipated that the finalization and submittal of the *Napa River SWRP* is projected for February 2023, following State Water Board concurrence of the *Napa River SWRP*.

Updates to the *Napa River SWRP* are projected to be completed approximately once every five years, although project opportunity lists may be updated more frequently. Updates to individual projects is anticipated to be completed by the individual entity responsible for the project through the use of the Napa County's regional GIS platform (described later in this section). Updates to the individual projects can include updates to the prioritization score based on new and updated conditions, as well as updates to individual project implementation, development, and completion.

Planning documents for specific projects will identify project-specific implementation schedules and timelines.

7.1.3 Community Participation

Through on-going feedback mechanisms and direct solicitation, NCSPPP and NCGSA member agencies encourage the continued community involvement and participation in the *Napa River SWRP* through adaptive management and implementation. It is anticipated that outreach for new stakeholder projects would occur periodically with SWRP updates.

In addition, the community is encouraged to participate by submitting individual projects or suggestions for projects eligible for inclusion in the *Napa River SWRP*. Guidelines for submitting individual projects or suggestions for projects can be found in **Appendix B**. The guidelines and instructions include details on the type of information required for submittal or inclusion to the *Napa River SWRP*.

Community engagement and participation will also occur during individual project implementation. Community engagement strategies will focus on the community where the project is located and will be implemented by the project sponsor.

The Napa River SWRP will be made available to the public on the NCSPPP website.

7.2 DECISION SUPPORT TOOLS FOR PLAN IMPLEMENTATION

NCSPPP and the NCGSA have developed or are in the processes of developing a number of tools that can be used as decision support tools for the implementation of projects identified in the *Napa River SWRP*. **Section 5** of this SWRP describes the decision support tools used to analyze and prioritize projects and provides the data necessary to use these tools. The tools and data included in **Section 5** will be used throughout the SWRP implementation.

7.3 IMPLEMENTATION TRACKING

NCSPPP and the NCGSA currently have a number of tools in place and/or in the process of development that will assist in tracking project performance over time, particularly as related to water quality improvements. These tools serve to track implementation of this Plan, as well as the Phase II MS4 Permit and the GSP. The Phase II MS4 Permit requires the stormwater programs to track the implementation of stormwater treatment and hydromodification management projects and implement an assessment program to assure the on-going maintenance of the systems. The GSP implementation tracking requirements are further described in **Section 7.3.1**.

To ensure the successful transition from project selection to implementation, projects may be brought to the NCSPPP Management Committee and NCGSA Technical Advisory Group with the relevant natural resource agencies to understand permitting processes and requirements. Project timelines are typically under continuous development, such that as funding becomes available, detailed timelines for feasibility analysis, design and construction for selected projects will be developed at that time.

Long-term implementation schedules will be determined by the level of funding available through grants and other sources, as well as integration of stormwater capture into regularly scheduled CIP improvements. However, although these stormwater capture projects have several additional multiple benefits that justify their implementation and investment, the level

of funding and regulatory requirements for Regulated Projects drive decisions for additional funding needs beyond current CIP project planning. Additionally, for larger regional projects, schedules will likely require more time for planning, phasing, design, and construction, and are therefore expected to be implemented over a longer timeframe. Ultimately, planning documents for specific projects will identify project-specific implementation schedules and timelines.

The Napa River SWRP is designed to be a living document that will be updated periodically in response to future calls for projects, and as project sponsors submit new information for projects already on the list or as they submit additional projects for consideration. As projects are implemented, the SWRP will be periodically updated to incorporate project designs, feasibility analysis and individual project status and/or the addition of new potential project locations (e.g., new parcels will be added to the "potential projects" list). Parcels for which projects are planned will go through the scoring process again to ensure that all project benefits have been identified.

7.3.1 GSP Implementation and Tracking Requirements

GSP implementation is described in Section 12 of the GSP³⁰ and involves coordination of NCGSA with the County of Napa, and other local, state, or federal agencies on the following tasks:

- GSA Administration
- GSP Implementation
- GSP Updates
- Monitoring and Data Management
- Contingency

GSP implementation progress including milestones, significant updates or changes, implementation schedule, and implementation tasks and costs will be reported in the required annual reports (as required by California Code of Regulations §356.2(c)). Evaluation of the GSP occurs every five years, with interim evaluations occurring with significant hydrologic changes or exceedances of minimum thresholds. Additionally, periodic (five-year) GSP assessments will be provided to the Department of Water Resources beginning in 2027. The NCGSA will evaluate whether the GSP implementation is achieving the sustainability goal of the Subbasin and may include updates to the GSP if monitoring of groundwater conditions determines that the groundwater sustainability goal is not being met by the plan.³¹ SGMA requires that groundwater basins meet their sustainability goals within 20 years of implementation and maintain sustainability for the next 50 years.

³⁰ Napa Valley Subbasin Groundwater Sustainability Plan (2022)

³¹ Napa Valley Subbasin Groundwater Sustainability Plan (2022)

7.4 WATER QUALITY MONITORING

7.4.1 Napa County Monitoring Program

Napa County and other agencies monitor groundwater and surface water resources. After North Bay fires in 2017, contaminants such as nutrients, polycyclic aromatic hydrocarbons (PAHs), copper, zinc, mercury, lead, and other metals were monitored in the Napa River Watershed.³² NCSPPP works with local agencies to manage surface water quality, while the NCGSA focuses on groundwater resources. In Napa County, the most frequently monitored constituents include sediment or turbidity, pathogens, and temperature.³³ Napa County also has a groundwater well monitoring service and publishes an annual report on groundwater conditions.

7.5 FUNDING NEEDS

Funding for implementation of projects included in the Napa River SWRP will be obtained by the municipal agency, partnerships of agencies, or other stakeholder project sponsors working to implement the identified projects. Project implementation will depend on funding availability.

It is anticipated that funding needs for the implementation of projects identified in the SWRP will be evaluated based on criteria including but not limited to, ballot approval, reliability, cost to implement the project, and potential barriers to implementation. Potential options for the evaluation of funding options include:

- Alternative compliance funds;
- Grant monies;
- New Tax or other levees;
- Partnerships with Caltrans or other governmental agencies in the watersheds;
- Municipal capital improvement project funding;
- Transportation funding; and
- Other state or federal grant programs.

As funding is identified for projects, the initial task for project implementation will involve a planning phase that will identify necessary permits, including evaluations for the California Environmental Quality Act. All necessary federal, state, and local permits, as well as CEQA evaluations, will be obtained by project proponents as needed for project implementation.

Stormwater Resource Plan Checklist and Self Certification

Storm Water Resource Plan Checklist and Self-Certification

The following should be completed and submitted to the State Water Resources Control Board Division of Financial Assistance in support of a storm water resource plan /functionally equivalent plan. The documents submitted, including this checklist, will be used to determine State Water Board concurrence with the Storm Water Resource Plan Guidelines and statutory water code requirements.

When combining multiple documents to form a functionally equivalent Storm Water Resource Plan, submit a cover letter explaining the approach used to arrive at the functionally equivalent document. The cover letter should explain how the documents work together to address the Storm Water Resource Plan Guidelines.

STORM WATER RESOURCE PLAN GENERAL CONTACT INFORMATION					
Contact Info:	Jeff Skinner, NCSPPP, and Jamison Crosby, NCGSA				
Name	Jeff: 707-259-8620 and Jamison: 707-253-4823				
Phone Number Email	jeff.skinner@countyofnapa.org and jamison.crosby@countyofnapa.org				
Date Submitted to State Water Resource Control Board:	TBD				
Regional Water Quality Control Board:	San Francisco Bay Regional Water Quality Control Board				
Title of attached documents (expand list as needed):	1. Napa River Watershed Stormwater Resource Plan				

STORM WATER RESOURCE PLAN INFORMATION				
Storm Water Resource Plan Title:	Napa River Watershed Stormwater Resource Plan			
Date Plan Completed/Adopted:	February 2023			
Public Agency Preparer: IRWM Submission:	Napa Countywide Stormwater Pollution Prevention Program and Napa County Groundwater Sustainability Agency			
Plan Description:	The Napa River Watershed (Napa River) Stormwater Resource Plan (SWRP) was created to facilitate the identification, development and implementation of stormwater management projects and programs that provide multiple benefits including improved water quality, reduced localized flooding, increased water supplies for beneficial			
	uses, and community enhancement.			

Checklist Instructions:

For each element listed below, review the applicable section in the Storm Water Resource Plan Guidelines and enter ALL of the following information. Be sure to provide a clear and thorough justification if a recommended element (non-shaded) is not addressed by the Storm Water Resource Plan.

- A. Mark the box if the Storm Water Resource Plan meets the provision
- B. In the provided space labeled **References**, enter:
 - Title of document(s) that contain the information (or the number of the document listed in the General Information table above);
 - The chapter/section, and page number(s) where the information is located within the document(s);
 - The entity(ies) that prepared the document(s) if different from plan preparer;
 - The date the document(s) was prepared, and subsequent updates; and

	 Where each document can be accessed¹ (website address or attach 	ed).
	STORM WATER RESOURCE PLAN CHECKLIST	
	AND SELF-CERTIFICATION	
	Mandatory Required Elements per California Water Code are Shaded and Text is Bold	
	Plan Element	Water Code
Y/N	Train Element	Section
	WATERSHED IDENTIFICATION	
	(GUIDELINES SECTION VI.A)	
Υ	Plan identifies watershed and subwatershed(s) for storm water resource planning.	10565(c) 10562(b)(1) 10565(c)
as descr	ces: Do County boundary and Napa River Watershed boundary delineate the planning area of to the dibed in Section 3, on page 7. Figure 2 shows the Napa River Watershed and the Napa Vall RP planning area.	

Υ

2. Plan is developed on a watershed basis, using boundaries as delineated by USGS, CalWater, USGS Hydrologic Unit designations, or an applicable integrated regional water management group, and includes a description and boundary map of each watershed and sub-watershed applicable to the Plan.

References:

The watershed within the planning area described in Section 3.1 is based on HUC-12 watershed boundaries. Several maps depict the watershed and groundwater subbasin, including Figure 1, Figure 2, Figure 3, Figure 5, Figure 5, Figure 5 6 and Figure 7.

¹ All documents referenced must include a website address. If a document is not accessible to the public electronically, the document must be attached in the form of an electronic file (e.g., pdf or Word 2013) on a compact disk or other electronic transmittal tool.

WATERSHED IDENTIFICATION

(GUIDELINES SECTION VI.A)

Y

3. Plan includes an explanation of why the watershed(s) and sub-watershed(s) are appropriate for storm water management with a multiple-benefit watershed approach;

References:

Sections 1 and **2** describe how the effort to create a SWRP for the Napa River Watershed was undertaken to efficiently use administrative resources in managing the planning grant project, and to integrate the SWRP development process with existing county-wide stormwater compliance coordination efforts.

Υ

4. Plan describes the internal boundaries within the watershed (boundaries of municipalities; service areas of individual water, wastewater, and land use agencies, including those not involved in the Plan; groundwater basin boundaries, etc.; preferably provided in a geographic information system shape file);

References:

Internal boundaries within the County are shown in the following: **Figure 4,** municipalities; **Figure 7**, water agencies; and **Figure 2**, groundwater basin.

Υ

5. Plan describes the water quality priorities within the watershed based on, at a minimum, applicable TMDLs and consideration of water body-pollutant combinations listed on the State's Clean Water Act Section 303(d) list of water quality limited segments (a.k.a., impaired waters list);

References:

Section 4 identifies water quality priorities within the County. Applicable TMDLs for these pollutants are listed on page 18 and pollutants of concern are described throughout **Sections 3** and **4.**

Υ

6. Plan describes the general quality and identification of surface and ground water resources within the watershed (preferably provided in a geographic information system shape file);

References:

Figure 2 and Figure 7 identify the groundwater basin and water agencies within the County, respectively.

Υ

7. Plan describes the local entity or entities that provide potable water supplies and the estimated volume of potable water provided by the water suppliers;

References:

Section 3.2 describes potable water suppliers within the planning area of the Napa River SWRP.

Υ

8. Plan includes map(s) showing location of native habitats, creeks, lakes, rivers, parks, and other natural or open space within the sub-watershed boundaries; and

References:

Figure 3 and Figure 5 show the land uses within the SWRP Planning area and the groundwater basin, respectively.

Υ

9. Plan identifies (quantitative, if possible) the natural watershed processes that occur within the sub-watershed and a description of how those natural watershed processes have been disrupted within the sub-watershed (e.g., high levels of imperviousness convert the watershed processes of infiltration and interflow to surface runoff increasing runoff volumes; development commonly covers natural surfaces and often introduces non-native vegetation, preventing the natural supply of sediment from reaching receiving waters).

References:

Section 3.5.1 describes how regional urbanization has led to the modification and disruption of watershed processes within the SWRP Planning area.

WATER QUALITY COMPLIANCE

(GUIDELINES SECTION V)

Υ beneficial use of storm water or dry weather runoff

10. Plan identifies activities that generate or contribute to the pollution of storm water or dry weather runoff, or that impair the effective

10562(d)(7)

References:

Section 4 describes activities that contribute to the pollution of storm water runoff and dry weather.

11. Plan describes how it is consistent with and assists in, compliance with total maximum daily load implementation plans and applicable national pollutant discharge elimination system permits.

10562(b)(5)

References:

Section 4 describes how the Napa River SWRP is consistent with and assists in compliance with applicable TMDL implementation plans and NPDES permits.

Υ

12. Plan identifies applicable permits and describes how it meets all applicable waste discharge permit requirements.

10562(b)(6)

References:

Section 4 identifies requirements in applicable permits and describe how the Napa River SWRP meets all applicable waste discharge permit requirements.

ORGANIZATION, COORDINATION, COLLABORATION (GUIDELINES SECTION VI.B)

Υ

13. Local agencies and nongovernmental organizations were consulted in Plan development.

10565(a)

References:

Section 6 describes coordination and collaboration with local agencies and nongovernmental organizations during Napa River SWRP development.

Υ

14. Community participation was provided for in Plan development.

10562(b)(4)

References:

Section 6 and Appendix C describe strategies for community participation and public education.

Υ

15. Plan includes description of the existing integrated regional water management group(s) implementing an integrated regional water management plan.

References:

Section 2.3.1 identifies and describes the Bay Area IRWMP.

ORGANIZATION, COORDINATION, COLLABORATION

(GUIDELINES SECTION VI.B)

Υ

16. Plan includes identification of and coordination with agencies and organizations (including, but not limited to public agencies, nonprofit organizations, and privately-owned water utilities) that need to participate and implement their own authorities and mandates in order to address the storm water and dry weather runoff management objectives of the Plan for the targeted watershed.

References:

Section 6 describes coordination among agencies and organizations within the County, and provides a list of stakeholders. Potable water suppliers are described in **Section 3.2**.

Y

17. Plan includes identification of nonprofit organizations working on storm water and dry weather

References:

Section 6 describes coordination among agencies and organizations within the County, and provides a list of stakeholders.

Υ

18. Plan includes identification and discussion of public engagement efforts and community participation in Plan development.

References:

Section 6 describes the public engagement and community participation efforts undertaken during *Napa River SWRP* development.

Υ

19. Plan includes identification of required decisions that must be made by local, state or federal regulatory agencies for Plan implementation and coordinated watershed-based or regional monitoring and visualization.

References:

Section 7 identifies decisions that must be made by regulatory agencies for SWRP implementation, and regional monitoring required by the San Francisco Bay Municipal Regional Stormwater Permit.

Y

20. Plan describes planning and coordination of existing local governmental agencies, including where necessary new or altered governance structures to support collaboration among two or more lead local agencies responsible for plan implementation.

References:

Section 6 describes the coordination among local government agencies for SWRP development and **Section 7** describes SWRP implementation.

Υ

21. Plan describes the relationship of the Plan to other existing planning documents, ordinances, and programs established by local agencies.

References:

Section 2.3 describes the relationship between the *Napa River SWRP* to the local IRWMP and other existing planning document.

N

22. (If applicable) Plan explains why individual agency participation in various isolated efforts is appropriate.

References:

This checklist item is not applicable to the Napa River SWRP as it was developed as a multi-agency effort.

QUANTITATIVE METHODS

(GUIDELINES SECTION VI.C)

Υ

23. For all analyses:

Plan includes an integrated metrics-based analysis to demonstrate that the Plan's proposed storm water and dry weather capture projects and programs will satisfy the Plan's identified water management objectives and multiple benefits.

References:

Section 5 describes the quantitative, metrics-based approach to multiple benefit prioritization of proposed projects.

24. For water quality project analysis (section VI.C.2.a)

Υ

Plan includes an analysis of how each project and program complies with or is consistent with an applicable NPDES permit. The analysis should simulate the proposed watershed-based outcomes using modeling, calculations, pollutant mass balances, water volume balances, and/or other methods of analysis. Describes how each project or program will contribute to the preservation, restoration, or enhancement of watershed processes (as described in Guidelines section VI.C.2.a)

References:

Section 5.5 describes the modeling approach to evaluating how projects will contribute to the restoration of watershed processes and PCBs/mercury load reductions. Section 4 describes the relevant requirements in the Phase II MS4 Permit.

Υ

25. For storm water capture and use project analysis (section VI.C.2.b):

Plan includes an analysis of how collectively the projects and programs in the watershed will capture and use the proposed amount of storm water and dry weather runoff.

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use projects were identified and prioritized.

Υ

26. For water supply and flood management project analysis (section VI.C.2.c):

Plan includes an analysis of how each project and program will maximize and/or augment water supply.

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects were identified and prioritized. **Section 5.5** describes how the volume of stormwater or dry weather runoff captured was quantified for projects, and **Appendix E** presents the results of quantification.

Υ

27. For environmental and community benefit analysis (section VI.C.2.d):

Plan includes a narrative of how each project and program will benefit the environment and/or community, with some type of quantitative measurement.

References:

Section 5.5 describes how environmental and community benefits were quantified for projects.

28. Data management (section VI.C.3):

Υ

Plan describes data collection and management, including: a) mechanisms by which data will be managed and stored; b) how data will be accessed by stakeholders and the public; c) how existing water quality and water quality monitoring will be assessed; d) frequency at which data will be updated; and e) how data gaps will be identified.

References:

Section 7.3 describes mechanisms for tracking project implementation, and procedures and frequency for updating these data. **Section 7.4** also describes water quality monitoring, and how monitoring data will be made publicly available.

IDENTIFICATION AND PRIORITIZATION OF PROJECTS

(GUIDELINES SECTION VI.D)

Y 29. Plan identifies opportunities to augment local water supply through groundwater recharge or storage for beneficial use of storm water and dry weather runoff.

10562(d)(1)

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects were identified and prioritized. **Appendix E** presents the list of project opportunities.

30. Plan identifies opportunities for source control for both pollution and dry weather runoff volume, onsite and local infiltration, and use of storm water and dry weather runoff.

10562(d)(2)

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects, projects that provide pollutant load reduction, and pollutant source control programs, were identified and prioritized. **Appendix E** presents the list of project opportunities.

31. Plan identifies projects that reestablish natural water drainage treatment and infiltration systems, or mimic natural system functions to the maximum extent feasible.

10562(d)(3)

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects, projects that provide pollutant load reduction, and pollutant source control programs, were identified and prioritized. **Appendix E** presents the list of project opportunities.

Υ

32. Plan identifies opportunities to develop, restore, or enhance habitat and open space through storm water and dry weather runoff management, including wetlands, riverside habitats, parkways, and parks.

10562(d)(4)

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects were identified and prioritized. **Appendix E** presents the list of project opportunities.

Υ

33. Plan identifies opportunities to use existing publicly owned lands and easements, including, but not limited to, parks, public open space, community gardens, farm, and agricultural preserves, school sites, and government office buildings and complexes, to capture, clean, store, and use storm water and dry weather runoff either onsite or offsite.

10562(d)(5) 10562(b)(8)

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects were identified and prioritized. **Appendix E** presents the list of project opportunities.

IDENTIFICATION AND PRIORITIZATION OF PROJECTS

(GUIDELINES SECTION VI.D)

Υ

34. For new development and redevelopments (if applicable):
Plan identifies design criteria and best management practices to
prevent storm water and dry weather runoff pollution and increase
effective storm water and dry weather runoff management for new
and upgraded infrastructure and residential, commercial, industrial,
and public development.

10562(d)(6)

References:

Section 2.3.4 identifies resources for new development and redevelopment criteria and best management practices.

Υ

35. Plan uses appropriate quantitative methods for prioritization of projects.

(This should be accomplished by using a metrics-based and integrated evaluation and analysis of multiple benefits to maximize water supply, water quality, flood management, environmental, and other community benefits within the watershed.)

10562(b)(2)

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects were identified and prioritized. **Section 5.5** describes the metrics-based evaluation in detail.

Υ

36. Overall:

Plan prioritizes projects and programs using a metric-driven approach and a geospatial analysis of multiple benefits to maximize water supply, water quality, flood management, environmental, and community benefits within the watershed.

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects were identified and prioritized. **Section 5.5** describes the metrics-based evaluation in detail.

Υ

37. Multiple benefits:

Each project in accordance with the Plan contributes to at least two or more **Main Benefits** and the maximum number of **Additional Benefits** as listed in Table 4 of the Guidelines. (Benefits are not counted twice if they apply to more than one category.)

References:

Sections 5.2 - 5.5 describe how stormwater and dry weather capture and use or infiltration projects were identified and prioritized. **Section 5.5** describes the metrics-based evaluation in detail.

IMPLEMENTATION STRATEGY AND SCHEDULE

(GUIDELINES SECTION VI.E)

Υ

38. Plan identifies resources for Plan implementation, including: 1) projection of additional funding needs and sources for administration and implementation needs; and 2) schedule for arranging and securing Plan implementation financing.

References:

Section 7 describes the implementation strategy for the *Napa River SWRP*, including resources for funding, administration, and implementation needs, as well as a schedule for implementation.

Υ

39. Plan projects and programs are identified to ensure the effective implementation of the storm water resource plan pursuant to this part and achieve multiple benefits.

10562(d)(8)

References:

Appendix E presents the list of project opportunities, including the responsible parties in order to ensure the effective implementation of the SWRP.

Υ

40. The Plan identifies the development of appropriate decision support tools and the data necessary to use the decision support tools.

10562(d)(8)

References:

Section 7.2 describes specific decision support tools to aid in the implementation of the Napa River SWRP.

- 41. Plan describes implementation strategy, including:
 - a) Timeline for submitting Plan into existing plans, as applicable;
 - b) Specific actions by which Plan will be implemented;
 - c) All entities responsible for project implementation;

Υ

- d) Description of community participation strategy;
- e) Procedures to track status of each project;
- f) Timelines for all active or planned projects;
- g) Procedures for ongoing review, updates, and adaptive management of the Plan; and
- h) A strategy and timeline for obtaining necessary federal, state, and local permits.

References:

Section 7 describes the implementation strategy for the *Napa River SWRP*, including the schedule for implementation, specific actions and entities responsible for project implementation, continued community participation strategy, resources for tracking the status of project opportunity implementation, as well as procedures for the ongoing review and updates of the SWRP.

42. Applicable IRWM plan:

The Plan will be submitted, upon development, to the applicable integrated regional water management (IRWM) group for incorporation into the IRWM plan.

10562(b)(7)

References:

Υ

The SWRP will be submitted to the San Francisco Bay IRWM group for incorporation into the IRWM plan. **Section 7.1.2** describes the implementation schedule.

IMPLEMENTATION STRATEGY AND SCHEDULE (GUIDELINES SECTION VI.E)

Υ

43. Plan describes how implementation performance measures will be tracked.

References:

Section 7.3 describes implementation tracking and data management tools and procedures for tracking implementation performance and other measures.

EDUCATION, OUTREACH, PUBLIC PARTICIPATION (GUIDELINES SECTION VI.F)

Υ

44. Outreach and Scoping:

Community participation is provided for in Plan implementation.

10562(b)(4)

References:

Section 6 and **Appendix C** describe the overall Stakeholder Outreach and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

Y

45. Plan describes public education and public participation opportunities to engage the public when considering major technical and policy issues related to the development and implementation.

References:

Section 6 and **Appendix C** describe the overall Stakeholder Outreach and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

Υ

46. Plan describes mechanisms, processes, and milestones that have been or will be used to facilitate public participation and communication during development and implementation of the Plan.

References:

Section 6 and **Appendix C** describe the overall Stakeholder Outreach and Coordination Strategy, a timeline for community participation, as well as the mechanisms, processes, and milestones used to engage with the public.

γ 47. Plan describes mechanisms to engage communities in project design and implementation.

References:

Section 6 and **Appendix C** describe the overall Stakeholder Outreach and Coordination Strategy, a timeline for community participation, as well as the mechanisms, processes, and milestones used to engage with the public. **Appendix B** is provided as a mechanism for continued public engagement.

Υ

48. Plan identifies specific audiences including local ratepayers, developers, locally regulated commercial and industrial stakeholders, nonprofit organizations, and the general public.

References:

Section 6 and **Appendix C** describe the overall Stakeholder Outreach and Coordination Strategy, as well as identifies specific audiences, key stakeholders, and public outreach vehicles that were targeted as part of the public engagement aspects of the *Napa River SWRP*.

EDUCATION, OUTREACH, PUBLIC PARTICIPATION (GUIDELINES SECTION VI.F)

Ν

49. Plan describes strategies to engage disadvantaged and climate vulnerable communities within the Plan boundaries and ongoing tracking of their involvement in the planning process.

References:

The SWRP does not describe specific strategies to engage disadvantaged or climate vulnerable communities, however, these factors may be considered during later stages of specific project implementation.

N

50. Plan describes efforts to identify and address environmental injustice needs and issues within the watershed.

References:

The SWRP does not describe specific strategies to address environmental injustice needs and issues, however, these factors may be considered during later stages of specific project implementation.

Υ

51. Plan includes a schedule for initial public engagement and education.

References:

Section 6 and **Appendix C** describe the overall Stakeholder Outreach and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

APPENDIX B

Project Request for Napa River Watershed Stormwater Resource Plan

PROJECT REQUEST FOR THE NAPA RIVER WATERSHED STORMWATER RESOURCE PLAN

The Napa County Stormwater Pollution Prevention Program (NCSPPP) and the Napa County Groundwater Sustainability Agency (Napa GSA) are developing the Napa River Watershed Countywide Stormwater Resource Plan (Napa River SWRP); the Napa River SWRP uses a watershed-based planning approach to both evaluate existing and potential project opportunities for the benefit of water quality, groundwater, and stormwater management. Projects included in the SWRP will be eligible for State funding sources.

Existing or potential project opportunities included in the Napa River SWRP must have a stormwater or groundwater management component and must provide two or more benefits from the following benefit categories: water quality, water supply, flood control, environmental, and community. Detailed descriptions of the benefit categories can be found in the SWRP Guidelines and in **Section 5** of the Napa River SWRP. Projects submitted for inclusion in the SWRP may provide benefits including but not limited to: creating and restoring wetlands for riparian habitat, improving in-stream flows, increasing park and recreation lands, increasing urban green space and tree canopy, augmenting recreation opportunities, reducing the heat island effect, and improving air quality. Additional potential project examples include: neighborhood or regional-scale green infrastructure, such as sustainable streets projects; flood control facilities; stream or wetland restoration projects; and groundwater recharge or stormwater harvest and use projects. Community benefits can include job creation and public education. For a complete list of the project benefits please consult the SWRP Guidelines¹.

Please send information about your planned projects using the accompanying spreadsheet available on the Napa County Website (TBD). In order to be included in the SWRP, the planned projects must be located within the project area of the SWRP, Napa River Valley watershed.

The spreadsheet includes an "Instructions" tab, and a "Project Information" tab. The "Project Information" tab should be filled out with information pertaining to your project. The "Instructions" tab includes a description of each element in the database. For your project(s) to be included in the SWRP project list, please fill out the cells below the "Required" (i.e., blue) column headers in the "Project Information" tab. Each project should be included on a separate line in the database. If known, you can also fill out any of the information below the "Optional" (i.e., yellow) column headers. Many columns include drop down lists you can select from when you click on the cell (supported by the hidden "Domains" tab in the spreadsheet).

"Required" information that must be submitted for your project(s) include:

Project Name

Project Proponents

Facility Type

1

https://www.waterboards.ca.gov/water issues/programs/grants loans/swgp/docs/prop1/swrp finalguidelines de c2015.pdf

- Project Description
- Project Jurisdiction
- Project Type
- Project Location (description, shapefile, APN, lat/long, address, ROW start and end points)
- Drainage Area
- Facility Size

To submit your information, please save a version of the spreadsheet and fill out the "Project Information" tab for all of the planned or potential projects your group would like to submit, and return to Jeff Skinner, the Stormwater Project Manager at the Napa Countywide Stormwater Pollution Prevention Program (jeff.skinner@countyofnapa.org).

Questions about completing the database may also be directed towards Jeff Skinner, the Stormwater Project Manager at the Napa Countywide Stormwater Pollution Prevention Program (ieff.skinner@countyofnapa.org), or Jamison Crosby, the Natural Resources Conservation Manager for the Napa County Groundwater Sustainability Agency (ieff.skinner@countyofnapa.org).

Required/Optional	Field Name	Field Instructions	Dropdown Options
	Project Name	Provide a brief project name	·
	Project Description	Provide a Project description narrative detailing why this project qualifies as a multi-benefit project under the requirements of the SWRP guidelines. Additional information on SWRP Guidelines can be found at the following link: https://www.waterboards.ca.gov/water_issues/programs/grants_loan s/swgp/docs/prop1/swrp_finalguidelines_dec2015.pdf	
	Project Jurisdiction	Indicate the city, town, or community the project is located in.

1 PURPOSE

The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency (NCGSA) are in the process of developing a Stormwater Resource Plan (SWRP) for the Napa River Watershed (Napa River), which is required as a condition for receiving state grant funding for multiple-benefit stormwater management projects.

Water Code Section 10562(b)(4) requires that the SWRP provide for community participation in SWRP development and implementation, and The Storm Water Resource Plan Guidelines (Guidelines)¹ states the following regarding public outreach requirements:

"To maximize community-based benefits, key stakeholders and the public should be involved in all appropriate implementation steps of the Storm Water Resource Plan. Public education and opportunities for public participation in actions, decisions, and projects implemented through watershed-based storm water management should be provided."

The Guidelines checklist includes one required and six recommended outreach elements.

\boxtimes	Outreach and Scoping: Community participation is provided for in Plan implementation.
	Plan describes strategies to engage disadvantaged and climate vulnerable communities within the Plan boundaries and ongoing tracking of their involvement in the planning process.
	Plan describes efforts to identify and address environmental injustice needs and issues within the watershed.
	Plan describes mechanisms to engage communities in project design and implementation.
	Plan identifies specific audiences including local ratepayers, developers, locally regulated commercial and industrial stakeholders, nonprofit organizations, and the general public.
	Plan describes strategies to engage disadvantaged and climate vulnerable communities within the Plan boundaries and ongoing tracking of their involvement in the planning process.
	Plan includes a schedule for initial public engagement and education.

Figure 1. Storm Water Resource Plan Community Participation Guidelines Checklist

This strategy is focused on meeting the required element and the overall intent of the Water Code to engage stakeholders and the public in the SWRP development and implementation processes.

¹ State Water Resources Control Board, December 2015. (https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/swrp_finalguidelines_dec20_15.pdf)

2 OUTREACH APPROACH

The recommended outreach strategy for the *Napa River SWRP* is to focus on key stakeholders, develop targeted messages for each stakeholder audience, and identify the methods to deliver the message to each stakeholder audience. This approach is intended for the SWRP development phase. Implementation of the SWRP will be conducted by the various jurisdictions within Napa County through the NCSPPP and the agencies and advisors participating in the NCGSA, as well as other local stakeholders and groups. **Section 3** identifies the recommended key stakeholder audiences and their potential interest in the project. **Section 4** provides a matrix linking the key stakeholder audiences and recommended method(s) to deliver the messages. Targeted messages for each audience will be developed and refined during the outreach campaign.

3 KEY STAKEHOLDER AUDIENCES

This section identifies the key stakeholder audiences that will be the focus of outreach efforts, including NCSPPP and NCGSA members, public landowners, non-profit organizations, and the public.

3.1 SWRP PARTICIPATING AGENCIES

The primary stakeholders in the development of the SWRP are the SWRP participating agencies who include Napa County municipalities, Napa County Flood Control and Water Conservation District, and NCGSA participating agencies and advisors.

3.2 NON-MUNICIPAL PUBLIC LANDOWNERS

In addition to the SWRP participating agencies that are actively engaged in SWRP development, the Guidelines characterize as "valuable partners" those non-municipal entities that own public lands and easements that could be used for multiple-benefit projects. Examples of such public landowners include school districts, park districts, water agencies, transportation/transit districts, and private utilities. According to the Guidelines, "...water agencies in particular can directly benefit from projects that use stormwater and dry weather runoff as a resource; these beneficiaries have the potential to be important partners and/or serve crucial inter-agency coordination roles."

To identify the non-municipal public landowner stakeholder audience, the *Napa River SWRP* project opportunities database was sorted to identify public landowners with parcels feasible for either stormwater infiltration or stormwater and groundwater infiltration and that are greater than four acres in size (this parcel size was selected to allow for focus on the significant landowners). **Attachment A** provides a listing of the non-municipal public landowners. The lists include 7 schools and school districts, the State of California, and the Napa County Housing Authority.

As noted in the above, the non-municipal public landowners are potential partners for stormwater multi-benefit projects. In the case of Caltrans, partnering on multi-benefit stormwater projects, may help Caltrans fulfill water quality compliance obligations for their

stormwater discharge permit and Total Maximum Daily Loads. Other non-municipal public landowners may be Phase II non-traditional stormwater permittees (e.g., public universities) or future permittees (e.g., K-14¹ school districts), and developing projects or partnerships may assist with their stormwater compliance requirements.

3.3 WATERSHED GROUPS AND OTHER NON-GOVERNMENTAL ORGANIZATIONS

The Guidelines emphasizes the importance of collaboration with non-governmental organizations (NGOs) during the SWRP development.

Napa County has numerous organizations engaged in watershed and creek protection and improvement. These organizations include:

- North Bay Watershed Association
- Friends of Napa River
- Napa Solano Audubon Society
- Mt. Veeder Stewardship Council
- Environmental Education Coalition of Napa County
- The Institute for Conservation Advocacy Research and Education (ICARE)
- Sustainable Napa County
- Land Trust of Napa County
- Watershed Information and Conservation Council
- Napa Valley Vintners Association
- Pepperwood Preserve
- San Francisco Estuary Institute
- Sierra Club
- Napa Vision 2050
- Yocha Dehe Wintun Nation
- Napa Valley Grape Growers
- Winegrowers of Napa County
- Growers/Vintners for Responsible Agriculture
- Napa Valley Farmworker Foundation
- Organizations serving underrepresented communities, such as Suscol Intertribal Council, Cope Family Center, UpValley Family Center, Boys & Girls Clubs, Puertas Abiertas, St. John's Catholic Church, and Latinos Unidos
- Public health organizations, such as Ole Health and St. Helena Hospital

¹ K-14 includes kindergarten through 12th grade and community colleges.

- Business and community interests, such as Napa Coalition for Change, League of Women Voters, Interfaith
 Councils, Rotary Club, Napa County Hispanic Chamber of Commerce, Napa County Hispanic Network,
 Local Chambers of Commerce, 4-H Clubs, Fair Housing Napa Valley, local real estate agents and
 developers, and well drilling contractors
- Napa County Regional Park and Open Space District
- Refugia Project
- News media, such as Napa Valley Register, Yountville Sun, St. Helena Star, and KVON Radio The majority of stakeholders within these organizations will be reached through outreach to the Watershed Information & Conservation Council (WICC).

In addition to creek and watershed organizations, because of the potential multi-benefit use of agricultural lands for groundwater recharge, the Napa County Resource Conservation District and the Napa County Farm Bureau represent additional stakeholders for the SWRP outreach effort.

3.4 BAY AREA INTEGRATED REGIONAL WATERSHED MANAGEMENT PLAN

Although the Bay Area Integrated Regional Watershed Management Plan (BAIRWMP) group technically is not considered a stakeholder in the Guidelines, including the Bay Area IRWMP in initial outreach efforts will help to inform this group that NCSPPP and NCGSA are developing a SWRP that ultimately will be submitted to the IRWM so that the SWRP projects can be included in the Bay Area IRWMP. Representatives to the Bay Area IRWMP include many of the stakeholder audiences for the SWRP including water supply, water quality, wastewater, stormwater, flood management, watershed and habitat agencies, local governments, environmental groups, business groups, community-based organizations, and disadvantaged communities.

3.5 GENERAL PUBLIC

The SWRP Guidelines require that opportunities be provided for community participation in SWRP development and implementation. While this can be largely achieved through the above identified stakeholder audiences, some of the outreach focus will be general to provide opportunities for interested individuals who do not identify with specific groups to participate. Community members may have an interest in project design and implementation that enhance community benefits.

4 MATRIX OF RECOMMENDED OUTREACH APPROACHES

The recommended strategy for efficient, cost-effective outreach is to capitalize on outreach methods that disseminate information to each stakeholder audience relying on cost effective methods already in use by NCSPPP and the NCGSA. **Table 1** provides a matrix relating each of the stakeholder audiences to the recommended outreach method. A conceptual approach for each of the methods is described following **Table 1**.

Table 1. Matrix of Stakeholder Audience and Outreach Methods

Stakeholder Audience	Outreach Method
SWRP Participating Agencies	MeetingsMailing List
Non-Municipal Public Landowners	Email List/Targeted MessagesGeneral FlyerSWRP Webpage
Watershed Groups and NGOs	 Email List/Targeted Messages General Flyer SWRP Webpage Targeted Social Media Messages
Bay Area IRWMP	 Targeted Email Messages Presentation at Bay Area IRWMP Meeting or Discussion with Subgroup Contract
General Public	SWRP WebpageTargeted Social Media Messages

4.1 EMAIL LIST AND TARGETED EMAIL MESSAGES

Email distribution lists would be developed for the noted stakeholder audiences from readily accessible information and contacts. Once an email distribution list is created, it is an efficient way to disseminate information to the targeted stakeholder audiences. For watershed and creek groups, rather than creating a new email list, email lists compiled by the Watershed Information and Conservation Council (WICC) and Groundwater Sustainability Plan (GSP) Interested Parties will be used. A message will also be shared with the Bay Area Watershed Network (BAWN) encouraging interested parties to sign up for the WICC or GSP Interested Parties lists to get updates about the SWRP.

Targeted email messages for the stakeholder audiences would be developed to explain why the SWRP development is of interest to the audience. In some cases, it will be appropriate to refine the messaging for subsets of stakeholder audiences; for instance, the messaging to school districts should be different than the messaging to Caltrans.

4.2 GENERAL FLYER

A general flyer for the SWRP project would be created. The flyer could have sections that would be customized for specific stakeholder audiences, but it might be more efficient to have one general flyer and then use the email message to convey the message for the specific stakeholder audience.

4.3 SWRP WEBPAGE

Working with the County of Napa webmaster, a stormwater resource information page would be created to provide general information on the SWRP and to serve as the landing place for stakeholder audiences to obtain information, submit projects, or request to be added to the stakeholder list. The SWRP information will be hosted on the County of Napa's website and the WICC website, to reach a broader audience. Key information including the project, schedule, and posting the SWRP for public review would be provided on the webpage. If a webpage is not feasible, then news items and documents can be posted within the existing website architecture.

4.4 SOCIAL MEDIA

The County of Napa currently uses social media (e.g., Facebook and Twitter) to post countywide information, including information about local water issues. Working with the County of Napa public information officer, messages and content for social media announcements will be developed.

4.5 BAIRWMP OUTREACH COORDINATION

Coordination with the BAIRWMP could take the form of attending and presenting an agenda item at a regular BAIRWMP meeting. This outreach would be coordinated with the BAIRWMP North Subregion contact (Matt Sagues) to determine the most appropriate means of outreach for this stakeholder audience.

Napa River Watershed Stormwater Resource Plan Outreach Materials

1.0 INTRODUCTION

Outreach materials developed for the Napa River Watershed Stormwater Resource Plan (SWRP) stakeholder groups consist of a general flyer and targeted messaging to specific audiences designed to be distributed through email distribution lists and posts to the County of Napa's Stormwater Program website and County of Napa social media accounts. Audience- and media-specific messaging and the method of distribution are provided in the sections below. The general flyer and messages posted to the County of Napa's Stormwater Program website and County of Napa social media accounts are made available for all stakeholder groups, including the general public. The general flyer is attached.

2.0 TARGETED MESSAGES FOR NON-MUNICIPAL PUBLIC LANDOWNERS

The primary/most efficient outreach method for the stakeholder groups identified in this section is the use of an email distribution list, consisting of email addresses for facilities managers and environmental compliance personnel. The email message targeting each stakeholder group is provided below, and was accompanied by the SWRP flyer found in **Attachment C**.

2.1. SCHOOLS AND SCHOOL DISTRICTS MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are developing a Stormwater Resource Plan (SWRP) for the Napa River Watershed, which is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). These projects are intended to reduce pollutants in stormwater and dry weather runoff, such as trash, fertilizer, and automotive fluids.

Public school districts and community college districts may have stormwater discharge requirements in the upcoming statewide stormwater permit for non-traditional Small Municipal Separate Storm Sewer Systems (MS4) (link: Phase II MS4 website). Property owned by your school/district may be eligible for grant-funded stormwater and dry weather runoff capture projects, which may provide opportunities to partner with your local municipality and assist your school/district with meeting the stormwater permit requirements. Green infrastructure projects may also provide benefits to the community, such as enhancement and/or creation of recreational and public use areas and increased green space and connectivity.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

2.2. WATER DISTRICTS AND SANITARY DISTRICTS MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are pleased to announce the development of a Stormwater Resource Plan (SWRP) for the Napa River Watershed. The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture (green

infrastructure) projects. Property owned by your agency or district may be eligible for grant-funded stormwater and dry weather runoff capture projects that are designed to reduce stormwater pollution, recharge groundwater, provide additional benefits to the community, and that may assist you with stormwater permit compliance. Your agency/district may benefit from SWRP projects that augment the water supply through groundwater infiltration and the use of stormwater in place of the potable water supply.

Once finalized, the SWRP will be submitted to the Bay Area Integrated Regional Watershed Management (IRWM) group so that the SWRP projects can be included in the IRWM Plan.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

2.3. PARKS DISTRICTS MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are pleased to announce the development of a Stormwater Resource Plan (SWRP) for the Napa River Watershed. The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). The SWRP is intended to be a resource for park districts and other interested parties that may want to obtain grant funding for local projects in the future.

Property owned by your district may be eligible for grant-funded stormwater and dry weather runoff capture projects that are designed to reduce stormwater pollution, recharge groundwater and provide additional community benefits, such as watershed improvement projects, enhancement and/or creation of recreational and public use areas, and increased green space and connectivity. Green infrastructure projects, if sited on park district property, may provide opportunities for your district to partner with your local municipality.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

2.4. TRANSPORTATION AND TRANSIT DISTRICTS MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are pleased to announce the development of a Stormwater Resource Plan (SWRP) for the Napa River Watershed. The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). Such projects are designed to reduce stormwater pollution, recharge groundwater, and provide additional community benefits.

Green infrastructure projects may provide opportunities for the transportation agency to partner with the local municipality and assist the transportation agency with stormwater permit compliance, including requirements related to Total Maximum Daily Loads.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

2.5. MISCELLANEOUS PUBLIC LANDOWNERS MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are pleased to announce the development of a Stormwater Resource Plan (SWRP) for the Napa River Watershed. The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). Such projects are designed to reduce stormwater pollution, recharge groundwater, and provide additional community benefits.

Property owned by your organization may be eligible for grant-funded stormwater and dry weather runoff capture projects. Green infrastructure projects may create opportunities for the utility to partner with the local municipality and assist the utility with stormwater permit compliance.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

3.0 TARGETED MESSAGES FOR NON-MUNICIPAL PUBLIC LANDOWNERS

The primary outreach method used for the stakeholder groups listed in this section is the use of email. Specific email messages for distribution to the primary contacts on the Watershed Information and Conservation Council (WICC) and Napa County Groundwater Sustainability Plan (GSP) Interested Parties email lists, the Bay Area Watershed Network (to encourage interested parties to subscribe to the aforementioned email lists for updates), and the Napa County Resource Conservation District (for subsequent distribution to Napa County growers) are provided below.

3.1. WICC AND GSP INTERESTED PARTIES EMAIL LISTS MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are pleased to announce the development of a Stormwater Resource Plan (SWRP) for the Napa River Watershed. The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). The SWRP requirement is intended to encourage the use of stormwater and dry weather runoff as a resource to improve water quality, reduce localized flooding, and increase water supplies for beneficial uses and the environment. As such, the SWRP is intended to be a resource for watershed groups and other interested parties that may want to obtain grant funding for local projects in the future.

Green infrastructure projects may be sited in your favorite watershed(s) to reduce stormwater pollution, use stormwater as a valuable resource, enhance habitat, and provide additional watershed and community benefits.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

3.2. BAY AREA WATERSHED NETWORK (BAWN) MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are pleased to announce the development of a Stormwater Resource Plan (SWRP) for the Napa River Watershed. The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). The SWRP requirement is intended to encourage the use of stormwater and dry weather runoff as a resource to improve water quality, reduce localized flooding, and increase water supplies for beneficial uses and the environment. As such, the SWRP is intended to be a resource for watershed groups and other interested parties that may want to obtain grant funding for local projects in the future.

Green infrastructure projects may be sited in your favorite watershed(s) to reduce stormwater pollution, use stormwater as a valuable resource, enhance habitat, and provide additional watershed and community benefits.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

3.3. NAPA COUNTY RESOURCE CONSERVATION DISTRICT MESSAGE

Message: "The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency are pleased to announce the development of a Stormwater Resource Plan (SWRP) for the Napa River Watershed. The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects. Farmers in your jurisdiction may benefit from SWRP projects that use stormwater for crop irrigation or groundwater recharge and that may create opportunities to partner with the local municipality.

We welcome your feedback. The draft SWRP is now posted on the County of Napa website for a public review and comment period of 30 days. Provide any feedback on the SWRP by December X, 2022."

4.0 TARGETED MESSAGES FOR BAY AREA INTEGRATED REGIONAL WATERSHED MANAGEMENT (BAIRWM) GROUP

An email containing the following message was sent to the BAIRWM Group representative:

"The Napa Countywide Stormwater Pollution Prevention Program (NCSPPP) and Napa County Groundwater Sustainability Agency would like to notify you that its Draft Stormwater Resource Plan (SWRP) for the Napa River Watershed has posted on the County of Napa website for a 30-day public review and comment period. Once finalized, the SWRP will be submitted to the IRWM group for inclusion in the IRWM Plan, as required by law.

We welcome your feedback. Provide any comments on the SWRP by December X, 2022."

5.0 TARGETED MESSAGES FOR GENERAL PUBLIC

Outreach methods used to inform the general public include information and messages posted on the County of Napa's Stormwater Program website and County of Napa social media accounts. The SWRP team plans to work with the NCSPPP media consultant to refine and distribute the social media messaging.

5.1. COUNTY OF NAPA/WICC WEBSITES

The general flyer can be posted on these websites. Specific content for the webpages will be developed based on the SWRP Executive Summary.

5.2. MUNICIPAL WEBPAGES

Each municipality can post the general flyer.

5.3. COUNTY OF NAPA'S FACEBOOK PAGE

The general flyer and/or other notices will be posted to the Facebook account.

5.4. COUNTY OF NAPA'S TWITTER FEED

Messages that meet the 280-character per-tweet limit will be posted to the Twitter account. An example 2-part tweet is provided below.

"NCSPPP and the Napa County GSA posted the Draft Stormwater Resource Plan (SWRP) for the Napa River Watershed today. The SWRP is required for receiving grant funding for stormwater and dry weather runoff capture projects. Visit [website link] for more information."

"SWRP projects green our neighborhoods - improving community and watershed health by providing improved pedestrian and bike safety, improved water quality, reduced flooding, and healthier watersheds. The SWRP is a resource for project sponsor to qualify for grant funding."
