ACKNOWLEDGEMENTS

This watershed management plan and its associated watershed assessment technical reports were made possible with funding from the California Bay-Delta Authority Watershed Program (project number WSP-01-FB-00145) and with the participation of several landowners in the Carneros Creek watershed. Without these funds and the enthusiasm of private landowners and the Carneros Creek Stewardship Group, the assessments and research necessary to make informed watershed planning decisions to protect, restore, and enhance our ecological and community resources would not be possible. Other contracted partners who contributed to this management plan and the associated technical reports include San Francisco Estuary Institute and Pacific Watershed Associates. The final technical reports that are the foundation of this management plan are available on CD from the Napa County Resource Conservation District and will be made available on-line in the future.

Several people contributed to the writing of this management plan, including Leigh Sharp, Jonathan Koehler and Bob Zlomke from the Napa County Resource Conservation District; Sarah Pearce, Robin Grossinger, and Lester McKee from San Francisco Estuary Institute; Eileen Weppner and Bill Weaver from Pacific Watershed Associates, and a subcommittee of landowners and managers from the Carneros Creek watershed.
